

This summer, access your eye care plan's benefit for prescription sunglasses!

Walking into bright light without sunglasses is not just uncomfortable—it can be harmful to your eyes, too.

Over time, too much UV exposure can lead to early cataract formation, eye cancer, and damage to the retina that can accelerate macular degeneration.

Help yourself prevent damage, improve your vision, and look great with prescription sunglasses this summer:

- Effective vision correction and quality lenses
- Protection against the sun's damaging UV rays
- Reduce squinting
- Adapt to darker settings more easily
- UV protection and improved eye comfort when you can't wear contact lenses

Even better, Davis Vision's updated Exclusive Collection, available through your vision plan, provides access to stylish frame options at little or no additional cost that can be used for prescription sunglasses. Use your plan's vision benefit and schedule an appointment, this summer, when the sun is at its brightest!

Check out Davis Vision's Exclusive Collection at davisvision.com/exclusive-collection.
